- Reuben Boakye

Your Health is Your Wealth, and Your Wealth is Your Knowledge.
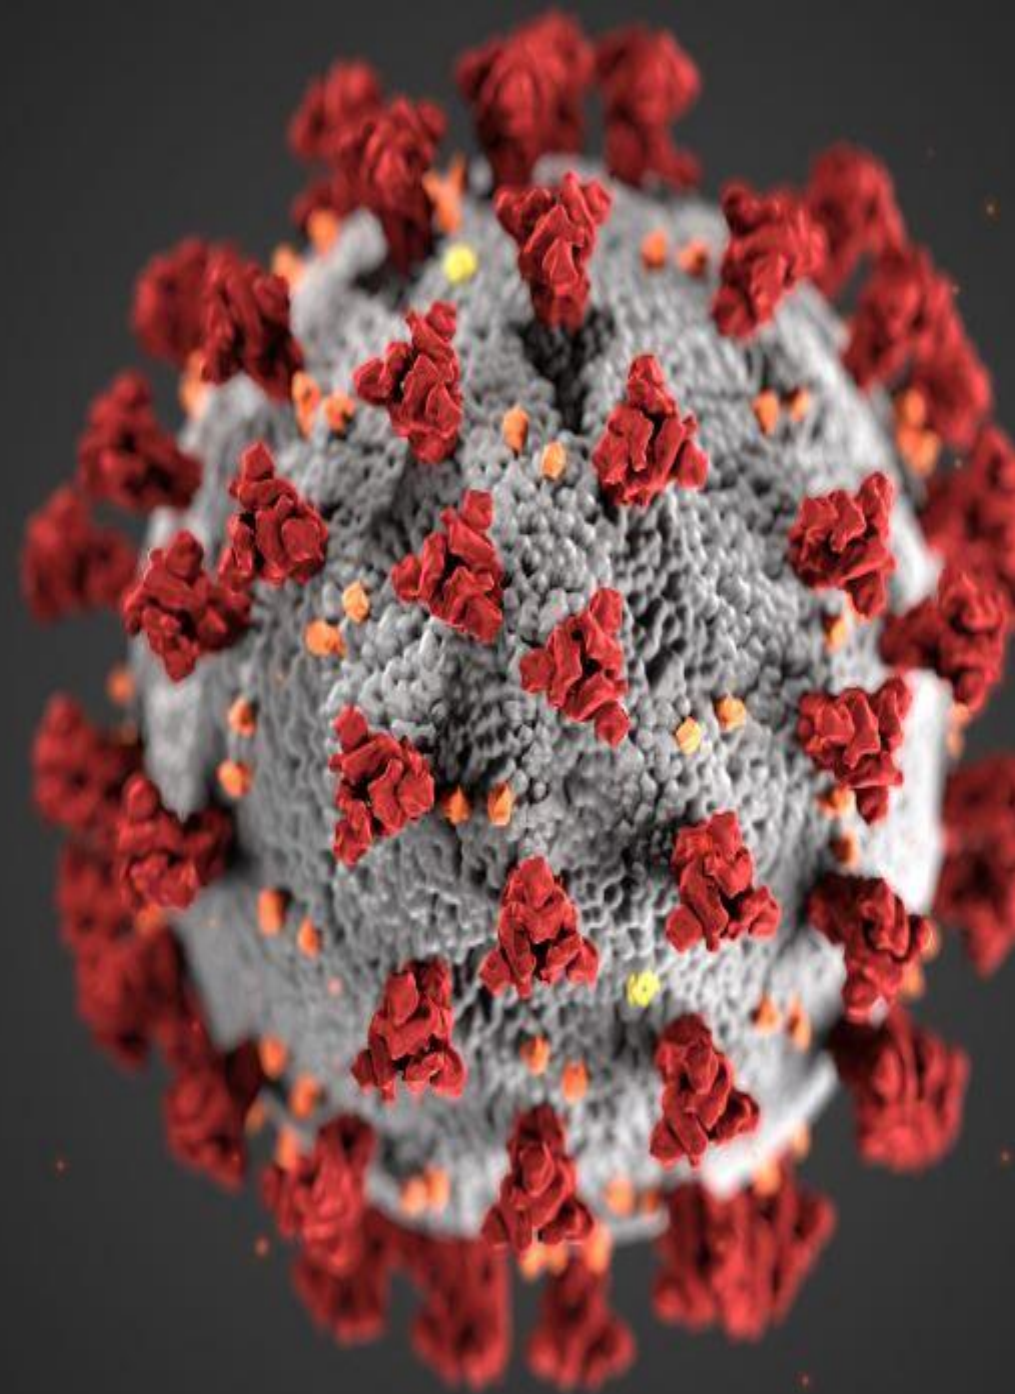

Stay informed and protected as you work from home in this Covid-19 ridden period.

The Problem

—Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). A novel coronavirus (nCoV) is a new strain that has not been previously identified in humans, and the new virus has been the reason for lockdowns in most countries since the second half of March 2020.
— With lots of Businesses affected because of social distancing protocols that have to be observed for the safety of everyone, there has been the surging need for remote work to be adopted if never used, or revisited if ever adopted.
—Now here lies the need for most companies to continue to find ways to keep their employees informed about the pandemic and provide helpful information that will keep them safe, and ensure their successful return to duty on prem when all is said and done.
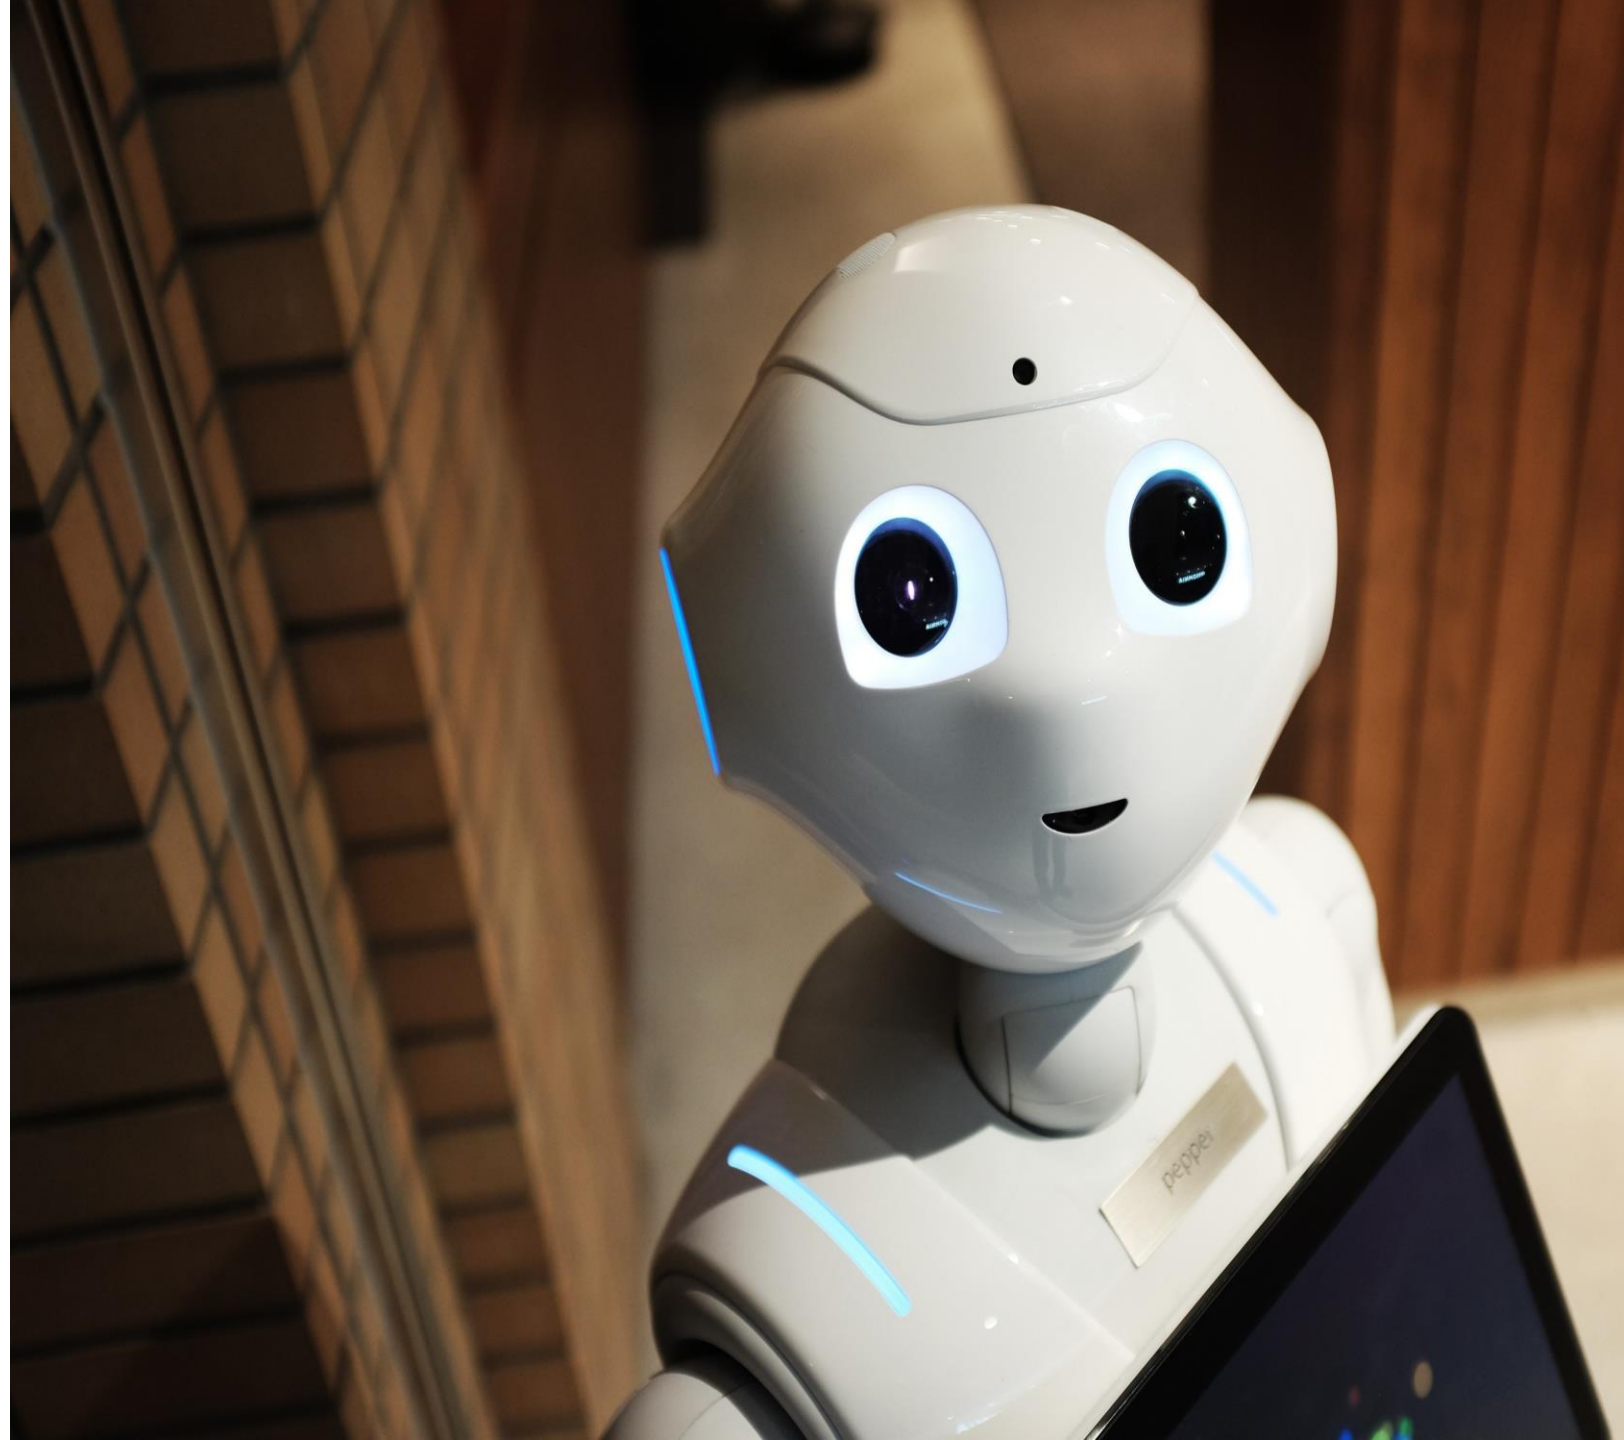

Purpose

 This will be an AI chat bot that should focus on providing helpful information about the novel Coronavirus, which will be geared toward integration with Microsoft Teams for the majority of businesses that use the platform for team communication, which in times like this where social distancing is strongly advocated for, should see a spike a number of users.

With actual situation, we have lot of rumors and misleading information, if there would be an uninterruptive way to educate employees with the right information and keep them updated on developments surrounding the novel pandemic while they work.
          This is where AI chat bot comes in the picture, where its usefulness can scale with time.
